

DIALOCK IN FURNITURE.

SAFE. INNOVATIVE. COMFORTABLE.

The electronic furniture locking system from Häfele – intelligent, invisible and absolutely reliable.

WHY CHOOSE DIALOCK FROM HÄFELE?

The requirements for electronic locking systems in furniture are becoming increasingly complex. Safe and intelligent solutions are needed.

The electronic furniture locking system from Häfele keeps you future-proof and flexible, thanks to the latest BLE technology. The system can soon be configured with maximum ease via smartphone or tablet. Uniform transponder technologies in the entire Dialock system also enable the combination and central operation of door and furniture locks.

DIALOCK IN FURNITURE SETS NEW STANDARDS

SAFE

Tested and certified products according to German quality standards for high product safety and consistent quality.

INNOVATIVE

Future-oriented solutions developed to meet customer needs.

COMFORTABLE

Quick installation, simple configuration, uncomplicated operation.

UNIQUE FEATURES OF DIALOCK IN FURNITURE

Trend-setting BLE technology for easy configuration e.g. via smartphone.

Time and cost savings thanks to fewer components.

Quick and easy plug & play installation.

Back-up and maintenance support packages available.

Combination of door and furniture locks using the same transponder technology.

Unobtrusive or even invisible installation of the components in the furniture.

State-of-the-art security technologies – reliable even for applications with maximum frequency of use.

DIALOCK ASSIST. BACK-UP AND MAINTENANCE SUPPORT.

The Dialock Assist after-sales service from Häfele provides the extra help needed to maintain the operation of Dialock electronic locking systems, so store owners and operators can keep doing what matters: helping customers, managing inventory, and keeping employees on track.

Our experts can be on hand to support for as long as required, with three levels of cover to select from:
