WHY HÄFELE?

A worldwide respected name in the industry, Häfele has been helping people make the most of their homes for over 100 years.

We work closely with the leading brands in the industry to bring you the highest quality products and the latest design innovations, all backed by our expertise and commitment to excellent customer service.

Find us on

OUR PARTNERSHIPS

Here at Häfele, we pride ourselves on offering one of the most extensive range of products and solutions in the industry. We've partnered with some of the world's leading appliance manufacturers, to bring you only the best quality products. With top of the range brands from around the globe, who share our core values of exceptional quality and superior performance.

By building strong relationships with these closely selected brands, we ensure only the finest products for our customers along with additional benefits, such as:

- > Extended warranties
- > Display deals
- > Promotional offers and product exclusives
- > Product training for our sales team and customers

SUPPORTING OUR CUSTOMERS

With a wealth of expertise, specifically geared towards getting the most for you, we work alongside our strategic suppliers to bring you the best quality products and service.

Look out for our Kitchen Studio Exclusives, premium and often award winning appliances designed exclusively for Kitchen Studios that you won't generally find available online. As a Häfele business partner, you have access to this select range ideally targeted for your market.

You will see these products highlighted with the Kitchen Studio Exclusive icon on the following pages.

SMEG PARTNER PROGRAM

The Smeg Partner Program is designed to support the KBB trade offering exclusive products and preferential pricing to those retailing Smeg appliances with kitchen furniture. Additional rewards are available to retailers who support the Smeg brand with showroom displays.

Split into three tiers, the program rewards Tier 3, Premium Displaying Partners (who display a minimum of five appliances), with best in market pricing, as well as benefits including a rebate, a listing on the Smeg UK dealer locator, promotions, extended warranties and free home delivery on Smeg range cookers.

Contact your Area Sales Manager for more information.

EASY TO ORDER

Designed around your needs, to make ordering as simple as possible. To place an order, please login to your account at hafele.co.uk, available 24/7.

If you would like further information about a product before ordering, please contact our Advice and Sales team on free phone **0800 171 2909**. For a more personal touch, please speak to your Area Sales Manager. We will happily take your order online or by phone.

APPLIANCE BRANDS

At Häfele, we are proud to offer a curated range of appliances from our trusted partners. For more information on our partners, please see below.

MERCURY

Mercury appliances are part of the AGA Rangemaster group. The Mercury brand is renowned for its bold, stylish and contemporary high-end range cookers. Built in the UK, the trend-setting Mercury range cooker offers top quality performance for enhanced cooking precision, ideal for those who love to cook. The highest attention to detail has been paid, from quality components that integrates sleek details, like Hi-Fi style controls to a stylish chrome handrail.

RANGEMaster

Rangemaster – Britain’s best loved range cooker brand. They made the world’s first range cooker in 1830 on the same site where they continue to design and manufacture all their range cookers, built in products and refrigeration. Today, much has changed at Rangemaster but their core principle of creating, beautiful, functional market leading appliances remains.

Smeg appliances take centre stage in a home, giving any space the unmistakable Smeg personality. With a cool Italian heritage, alongside an inventive originality and timeless elegance, Smeg are able to offer customers tasteful home appliances that make a statement. As one of Smeg's UK distributors to the trade, we are proud to be able to offer the full range of Smeg products to view online at hafele.co.uk

The concise but comprehensive range from Hoover includes appliances with the latest technology, from touch screens to Wi-Fi connectivity. All Hoover appliances come with a 10-year parts guarantee and 2-year labour. What's more, the comprehensive Hoover Aftersales Service Promise covers every eventuality. So, in the unlikely event of a fault occurring there's no need to worry.

The range of appliances from Candy includes the latest Wi-Fi connectivity technology. Easy to use, good to look at and great value, making this range suitable for any kitchen. All Candy appliances come with a 10-year parts guarantee and 2-year labour.

Smeg Sabbath Mode

Discover Smeg Mehadrin certified Sabbath mode Ovens

Smeg have been awarded the status of super kosher on a large selection of our ovens by FEDTECH.

This function has been specifically designed to meet the strict Shabbat Law requirements of the Jewish community and as such these ovens have been certified mehadrin (Super Kosher) compliant by the Rabbis at FedTech (The Federation of Synagogues).

What is Sabbath?

Shabbat, Shabbos, or the Sabbath is a day of religious abstinence from a number of activities recognised by Jewish law. It begins before sunset on Friday afternoon and ends at nightfall on Saturday evening each week. During this time, Jewish families immerse themselves in enjoying simple pastimes, good food and good company without the daily distractions of technology and chores. By escaping the hustle and bustle of everyday life, they can be fully present and appreciate some much-needed downtime. Sounds appealing right?!

Why has Smeg developed a Sabbath function?

Smeg want their products to be as inclusive as possible and by diligently creating a dedicated Sabbath function on their ovens, they have been able to fully comply with the Jewish requirements for Shabbat. This means that Smeg ovens, which are certified 'Super Kosher', can be a confident option for the Jewish community, who unfortunately have limited choices at present. Smeg also place great relevance on family, for Smeg family is everything. The Jewish laws of the Sabbath reinforce how important quality time together is as a family, which is something we can appreciate. Not to mention Smeg's love of food and how it plays such a crucial role in the home, Sabbath places great importance on enjoying sacred meals throughout the day together.

How do our ovens fit in?

Jewish law prohibits cooking on the Sabbath. This means that in order to enjoy a warm meal, food must be cooked beforehand and then kept warm using the Sabbath function. This function has a temperature range of 60-150°C and also complies with a number of electrical requirements which are listed below:

- > No door-activated switching on/off light
- > No door activated change to display/LED screens.
- > No door-activated switching on/off heating elements
- > No door-activated switching on/off motors
- > No door-activated solenoids are activated
- > Heating cycle is not triggered faster due to door opening
- > Heating cycle is not extended when door is opened
- > Closing the oven door will not indirectly trigger or enable a future heating cycle

The Sabbath function is available in selected models from Dolce stil Novo, Linea, Classic and Victoria ranges

Smeg Galileo

Built-in appliances

MULTICOOKING
TECHNOLOGY

Galileo is an innovation from Smeg. A smart cooking platform that makes it possible to combine traditional, microwave and steam cooking technologies. Thanks to clever pre-set programmes, ovens featuring the Galileo platform will automatically select the most appropriate cooking method to give you the quickest, most succulent and delicious results. With Galileo cooking becomes smarter, faster and more sustainable.

The Galileo cooking platform encompasses the following technologies:

OMNICHEF - ● TRADITIONAL ● STEAM ● MICROWAVE

At its top tier Galileo showcases Omnichef, the perfect balance of traditional, steam and microwave cooking. Omnichef ovens combine all three technologies offering infinite cooking possibilities and ensuring meal preparation is up to 70% faster. This platform will add a sensational wow factor to your kitchen projects

SPEEDWAVE & SPEEDWAVEXL - ● TRADITIONAL ● MICROWAVE

Traditional and microwave cooking all in one oven. By combining traditional cooking with microwave, you can save up to 40% on cooking times without losing the quality of your food

STEAMONE, STEAM100 & STEAM100 PRO - ● TRADITIONAL ● STEAM

Combine traditional and steam cooking to create tasty and nutritious dishes. SteamOne models also feature convenient pyrolytic self-cleaning

The Galileo platform is available in selected models from Dolce stil Novo, Linea, Classic and Victoria ranges

Key features:

- > Award winning, market leading technology
- > Quicker cooking times with no pre-heat required
- > Nutritious results
- > Extensive variety of design and technology options
- > Smeg 2 or 5 year warranty

Omnichef Ovens

Built-in multi function ovens with traditional, steam & microwave cooking functions

Linea appliances with neptune grey - Omnichef vapour single multifunction oven 536.74.814, blast chiller 536.74.114 and vacuum drawer 536.54.744, angled chimney hood 535.84.144, induction hob

536.74.814 - Linea Omnichef single multi function oven, neptune grey

THE GALILEO PROJECT - Galileo is a completely Made in Italy project. Innovation, design, experience and sustainability are the values that characterise the production philosophy. All the new ovens, thanks to a complete redesign, aspire to revolutionise the cooking experience in the home, bringing professional results and restaurant quality.

Alongside Omnichef the Galileo family features SteamOne and SpeedwaveXL models.

SteamOne ovens combine traditional and steam cooking technologies with the benefits of enhanced flavour, healthy results and all of the nutrients.

SpeedwaveXL ovens add the speed of microwave technology to traditional cooking for even browning results and a saving of up to 40% of cooking time. SpeedwaveXL ovens are among the largest microwave ovens ever with a full-sized cavity.

Pyrolytic Ovens

Built-in multi function ovens with Pyrolytic cleaning function

Smeg Victoria appliances in cream finish - Pyrolytic single multifunction oven 536.74.855, gas hob 536.04.101, chimney hood 536.84.235, dishwasher 536.24.515 and FAB 28 Union Jack freestanding fridge with ice box 536.14.239

Ovens with a pyrolytic function are the ultimate solution for ease of cleaning. Through the pyrolytic cleaning function, all dirt and grease is burned away effortlessly and transformed into ash which can be simply wiped away. There is no need for detergents, thanks to the extremely high temperature reached by the oven.

Selected ovens in our wi-fi controlled oven section also benefit from this premium function.

Feature and specification comparison table, see pages 33-35

Vapour Clean Ovens

Built-in multi function ovens with Vapour cleaning function

Smeg Classic appliances - Induction hob and island hood, single oven, compact combi microwave and warming drawer - Smeg Classic aesthetic range listed on pages 20-21

The eco-friendly vapour clean function makes cleaning easy through the power of steam. Vapour is generated in the oven cavity releasing burnt food and grease from the oven walls, allowing it to be easily wiped away.

➔ Smeg Galileo Technology range available, see pages 10-11

Steam & Steam Assisted Ovens

Built-in multi function ovens with steam assist function

Smeg Dolce Stil Novo SteamOne steam assisted single multi function oven - 536.74.161 see page 46

In addition to offering standard cooking functions steam and steam assisted ovens inject steam directly into the oven cavity where it is distributed equally via the fan, offering excellent results when cooking meat, bread and a variety of other foods.

Steam cooking allows you to reduce cooking times, keeps weight loss to a minimum and is a healthier way to cook.

Smeg Galileo Technology range available, see pages 10-11

Microwave Assisted Ovens

Built-in multi function ovens with microwave assist function

Smeg Classic SpeedwaveXL microwave assisted single multi function oven - 536.74.873 see page 49

Traditional and microwave cooking all in one oven. By combining traditional cooking with microwaves you can save up to 40% on cooking times without losing the quality of your food.

Smeg SpeedwaveXL ovens also include a number of features designed to achieve the very best results;

- > **Inverter technology** which cooks in a more gradual and consistent way, vs traditional microwaves, producing even cooking results
- > **Stirrer technology** to evenly distribute microwaves so a turntable is no longer necessary
- > **Double chimney technology** for an improved air flow which reduces condensation inside of the oven

+ Smeg Galileo Technology range available, see pages 10-11

Wide 900 mm Ovens

Built-in wide 900 mm multi function ovens

For those who love cooking, Smeg 900 mm ovens represent a fantastic tool.

Thanks to spacious capacities, these extra wide ovens not only enable several dishes to be cooked at once, but bulky wide items can be accommodated with ease.

Perfect, speedy cooking is guaranteed thanks to 3 fans, which distribute heat evenly for impeccable results.

Hoover double oven 536.08.200

Built Under Double Ovens

Built under double ovens

Hoover H500 & H700 aesthetic range available, see page 22

With two cavities to cook in, double ovens offer plenty of choice, flexibility and oven space ideal for family cooking or if you need the extra space for entertaining guests.

The separate grill compartment is great for quick cooking or browning foods such as pork chops and sausages.

Under counter double ovens are designed for low level installation, below your work-surface.

Combination Microwave Ovens

Built-in compact combination microwave ovens

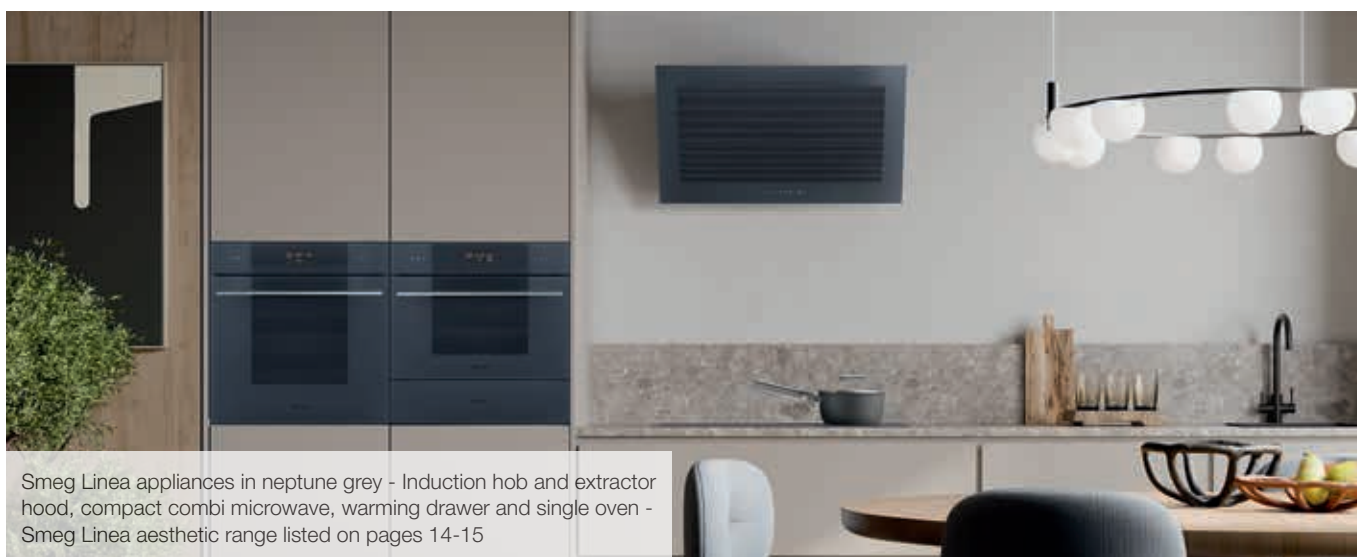

Smeg Victoria appliances - Induction hob and extractor hood, compact combi microwave and single oven - Smeg Victoria aesthetic range listed on pages 16-17

Microwave cooking dramatically reduces cooking times and can offer notable energy savings. However it's often the convenience of microwave cooking which makes it a must have appliance.

In microwave cooking, heat is generated directly inside the food so that it can be defrosted, re-heated or cooked in less time compared to traditional cooking. You can defrost by weight or time, reheat, even preparing a full meal is achievable in arguably the handiest appliance in the kitchen, combination microwaves with multifunction oven capabilities.

Smeg Linea compact combi microwave oven - 536.74.354 see page 66

Smeg Linea appliances in neptune grey - Induction hob and extractor hood, compact combi microwave, warming drawer and single oven - Smeg Linea aesthetic range listed on pages 14-15

Microwave Oven

Built-in microwave oven with grill

Smeg CLassic appliances now available in black glass with matt black trim - Angled chimney hood 535.84.191, gas hob 536.04.181, pyrolytic single multifunction oven 536.74.531 and compact combi microwave oven 536.74.901

Microwave ovens with grills incorporate a grill element along with the standard microwave functionality. This combines the heating power of a microwave with the browning and crisping abilities of a traditional grill.

Microwave grilling provides a convenient cooking option allowing you to achieve a grilled-like texture and appearance for your food without the need for an additional appliance.

Compact Microwave Ovens

Built-in compact microwave ovens with grill, reduced cavity depth

Smeg Linea compact microwave oven with grill - 536.34.221 see page 73

Microwave ovens with grills offer quick and efficient cooking technology.

These models ensure heat is generated directly inside the food so that it can be defrosted, re-heated or cooked in less time compared to traditional cooking methods.

These compact models require a minimum cavity depth of just 320 mm for ultimate flexibility of installation.

Warming Drawers

Built-in warming drawers, 135-145 and 290 mm heights

Smeg Classic appliances - Single oven, compact combi microwave and warming drawer - Smeg Classic aesthetic range listed on pages 20-21

Warm up plates and cups before serving, defrost, keep food warm or simply reheat, warming drawers have many uses.

135-145 mm height warming drawers are suitable for fitting directly beneath a 450 mm height compact oven where both items fit in a standard 600 mm aperture.

290 mm height warming drawers are especially popular with home bakers for use as proving drawers. They are suitable for fitting directly beneath a standard, compact and microwave ovens or coffee machines in a column.

Feature and specification comparison table, see pages 82-83

Vacuum Drawers

Built-in vacuum drawers

Smeg Classic vacuum drawer -
536.54.932 see page 89

Vacuum drawers are excellent for preserving foods for longer and enhance the protection when freezing and cooking food. They are also perfect for preparing food ready for delicate sous vide cooking.

Foods last, on average, four times longer at room temperature or in the fridge. If frozen, food can be kept for months and retain all flavors and consistency, as if it had just been prepared. The vacuum process protects the food items from dust and bacteria. Even liquid can be vacuum sealed.

Induction Range Cookers

Freestanding single cavity range cookers with induction hobs, 900 mm wide

Smeg Portofino induction range cooker and chimney hood in yellow with stainless steel trim - CPF91PYW Special order see page 99

Our 900mm, single cavity cooker models feature simplicity of design with the benefit of an extra-large oven capacity, offering increased space and versatility for those wanting to optimize cooking times for multiple dishes placed in the oven simultaneously, without flavour transfer.

Induction hobs are significantly faster in operation versus gas, giving you the possibility to speed up cooking times.

Heat is only generated when the pan comes into direct contact of the specific cooking zone, ensuring safety in the presence of children.

Induction allows for precise temperature control when doing intricate cooking, or simmering for example.

Induction Range Cookers

Freestanding dual and triple cavity range cookers with induction hobs, 900 mm wide

Smeg Portofino induction range cooker in black with chrome trim - 536.74.731 see page 106

Our 900mm, dual and triple cavity cooker models feature a main oven, auxiliary oven and grill for ultimate flexibility.

Induction hobs are significantly faster in operation versus gas, giving you the possibility to speed up cooking times.

Heat is only generated when the pan comes into direct contact of the specific cooking zone, ensuring safety in the presence of children. This helps optimise power consumption, only using the energy needed to heat the pan itself.

Induction allows for precise temperature control when doing intricate cooking, or simmering for example.

Rangemaster Elan Deluxe induction range cooker in Royal Pearl Grey - 535.01.272 see page 107

Induction Range Cookers

Freestanding range cookers with induction hobs, 1000 mm wide

Mercury induction range cooker in ash black (satin) with chrome trim - 533.61.001 see page 116

Our wide selection of 1000 mm, induction cooker models all feature generous oven cavities to optimize cooking capacity.

Induction hobs are significantly faster in operation versus gas, giving you the possibility to speed up cooking times.

Heat is only generated when the pan comes into direct contact of the specific cooking zone, ensuring safety in the presence of children. This helps optimize power consumption, only using the energy needed to heat the pan itself.

Induction allows for precise temperature control when doing intricate cooking, or simmering for example.

Induction Range Cookers

Freestanding range cookers with induction hobs, 1100 mm wide

Mercury induction range cooker in indigo blue with chrome trim - Special order see page 128

Our wide range of 1100 mm wide induction cookers feature a multifunction main oven, auxiliary oven and grill.

In addition, some also offer a convenient storage drawer for pans and baking trays.

Induction hobs are significantly faster in operation versus gas, giving you the possibility to speed up cooking times.

Induction allows for precise temperature control when doing intricate cooking, or simmering for example.

Rangemaster Elan Deluxe induction range cooker in royal pearl - 533.01.054 see page 129

Induction Range Cookers

Freestanding range cookers with induction hobs, 1200 mm wide

Mercury induction range cooker in stainless steel with chrome trim - 533.61.042 see page 138

The Mercury 1200 range cooker delivers the perfect fusion of uncompromising quality, innovative design and performance. Intuitively designed with meticulous attention to detail, the vibrant colours and cutting edge styling add a bold statement to any kitchen. With a huge cooking area, two ovens, separate grill and large hob, this is more than just a stunning appliance; it is the epitome of design, innovation and a true culinary experience.

Key features:

- > Electric induction hob with electric ovens
- > Choice of 7 finishes
- > Heavy duty stainless steel shelving
- > Separate robust dual element grill
- > Hi-Fi style controls
- > Soft touch storage drawer
- > A energy rating
- > Seal of quality through every cooker
- > Hot hob Indicators for added safety, easy clean surface

Ceramic Range Cookers

Freestanding range cookers with ceramic hobs, 600 mm wide

Rangemaster Professional+ in stainless steel - 535.01.862 see page 141

Our affordable range of 600 mm, ceramic hob cooker models feature two oven cavities for flexible cooking.

Ceramic glass hobs are very easy to keep clean. The glass surface lends itself to being wiped down after the zones have cooled and the smooth design means that there are few surfaces to consider when cleaning it.

Ceramic Range Cookers

Freestanding range cookers with ceramic hobs, 1100 mm wide

Rangemaster Classic Deluxe ceramic range cooker in cream with chrome trim - 533.01.013 see page 153

Our selection of 1100 mm, ceramic hob cooker models feature a main oven, auxiliary oven, grill and convenient storage drawer for trays and pans.

Ceramic glass hobs are very easy to keep clean. The glass surface lends itself to being wiped down after the zones have cooled and the smooth design means that there are few surfaces to consider when cleaning it.

Dual Fuel Range Cookers

Freestanding range cookers with gas hobs, 600-700 mm wide

Rangemaster Professional+ dual fuel range cooker in black with chrome trim - 533.01.2611 see page 159

Our selection of 600-700 mm, dual fuel cookers allow anyone with a smaller kitchen the option to achieve the conventional aesthetic of a range cooker in compact form. They are an ideal option for kitchens where space is at a premium; compact, city-style kitchens and loft-style apartments, for example.

These cookers feature either one oven cavity to optimize capacity or two oven cavities for flexible cooking. Some also have a convenient storage drawer for trays and pans.

Dual Fuel Range Cookers

Freestanding single cavity range cookers with gas hobs, 900 mm wide

Rangemaster Professional+ FXP dual fuel range cooker in with stainless steel - 535.01.343 see page 162

Our selection of 900 mm dual fuel, single cavity cookers offer simplicity of design whilst optimizing capacity.

These single cavity models are ideal to fit larger dishes, such as the Christmas turkey and trimmings, as well as extra-wide trays – making them the perfect choice for families and those who love entertaining guests.

Dual Fuel Range Cookers

Freestanding dual and triple cavity range cookers with gas hobs, 900 mm wide

Rangemaster Elise dual fuel range cooker in white with nickel trim - 533.01.308 see page 170

Our extensive selection of 900 mm dual fuel, dual and triple cavity cookers offer a main oven, auxiliary oven and in most cases a third oven or separate grill for ultimate flexibility when cooking.

These models pair electric ovens with gas hobs which offer instant and easy-to-control heat. Gas burners spread heat evenly across the base of the pan when cooking, which means less time needed on stirring the food.

Dual Fuel Range Cookers

Freestanding range cookers with gas hobs, 1000 mm wide

Rangemaster Professional Deluxe dual fuel range cooker in white with chrome trim - 535.01.414 see page 183

Our range of 1000 mm dual fuel, triple cavity cookers offer a main oven, auxiliary oven and in most cases a third oven or separate grill for ultimate flexibility when cooking.

These models pair electric ovens with gas hobs which offer instant and easy-to-control heat. Gas burners spread heat evenly across the base of the pan when cooking, and are compatible with all types of cookware.

Smeg Victoria dual fuel range cooker in slate grey with stainless steel trim - 535.64.714 see page 181

Mercury dual fuel range cooker in blueberry blue with chrome trim - Special order see page 180

Dual Fuel Range Cookers

Freestanding range cookers with gas hobs, 1200-1500 mm wide

Smeg Portofino dual fuel range cooker in white with stainless steel trim - 536.64.907 see page 205

For those with larger kitchens our selection of 1200-1500 mm dual fuel cookers make a real statement. These models offer maximum cooking capacity and a convenient storage drawer for trays and pans.

Dual fuel cookers pair electric ovens with gas hobs offering instant and easy-to-control heat.

Selected models within this premium range even have mixed fuel hobs with both gas burners and induction zones offering the ideal solution whatever your cooking needs.

Induction Hobs

Induction hobs, 300 mm wide

Smeg built-in Domino hobs are available in a selection of different fuel types - induction, ceramic and gas

Our selection of 300 mm induction hobs are an ideal solution when space is at a premium.

Induction hobs allow for precise temperature control when doing intricate cooking, or simmering for example. Heat is only generated when the pan comes into direct contact of the specific cooking zone, ensuring safety in the presence of children. This helps optimize power consumption, only using the energy needed to heat the pan itself.

Induction is faster than gas cooking taking only a little over a minute to boil a pint of water. Another benefit is that any splashes will not burn onto the hob top and are easily wiped clean making it safe and user friendly.

Smeg Domino modular hobs range available, see pages 268-269

Induction Hobs

Induction hobs, 600 mm wide

Smeg Victoria appliances - Induction hob and Retro Style extractor hood, single oven and compact combi microwave - Smeg Victoria and 50's Retro Style aesthetic ranges listed on pages 18-19

Induction hobs are an economical choice as heat is only generated when the pan comes into direct contact of the specific cooking zone, ensuring safety in the presence of children. This helps optimize power consumption, only using the energy needed to heat the pan itself.

Induction is also easy to clean. Any splashes will not burn onto the hob top and are easily wiped away making induction safe, hygienic and user friendly.

A selection of induction hobs in the range also include auto-vent technology. This is a system that links hobs and compatible hoods; Smart Bluetooth technology has been used to connect hobs and hoods with Auto-vent so that they work seamlessly together. Once cooking begins, the fan speed of the hood automatically adjusts according to the temperature and power selected on the hob. The hood will continue to automatically regulate the fan speed as required, depending on the cooking activities. A selection of induction hobs in the Smeg range work with Auto-vent 2.0 hoods.

Induction Hobs

Induction hobs, 700-930 mm wide

Smeg black glass multizone induction hob - 536.64.251 see page 229

Our selection of 700-900 mm induction hobs offer flexible cooking solutions for larger kitchens.

Induction hobs allow for precise temperature control when doing intricate cooking, or simmering for example. Heat is only generated when the pan comes into direct contact of the specific cooking zone, ensuring safety in the presence of children. This helps optimize power consumption, only using the energy needed to heat the pan itself.

Induction is easy to clean as any splashes will not burn onto the hob top and are easily wiped clean.

Hoover black glass induction hob - 536.98.603 see page 229

Induction Hobs with Extraction

Induction hobs with in built downdraft extractors

Smeg Dolce Stil Novo black glass with copper trim induction hob with extractor - 536.64.151 see page 231

Smeg's 'HOBD' hood in hobs are composed of a single piece of premium glass. Protected by an elegant cast iron grill, the HOBD's extraction system allows the entire surface to appear completely seamless - pans can be moved freely between positions.

All of HOBD's energy are derived from their powerful motors: boasting effective performance and low energy consumption.

Compact in size, the motor is equipped with a special AquaProof Engine plus two liquid collectors, ensuring the appliance is simple to clean whilst containing accidental spillages.

Mixed Fuel Hobs

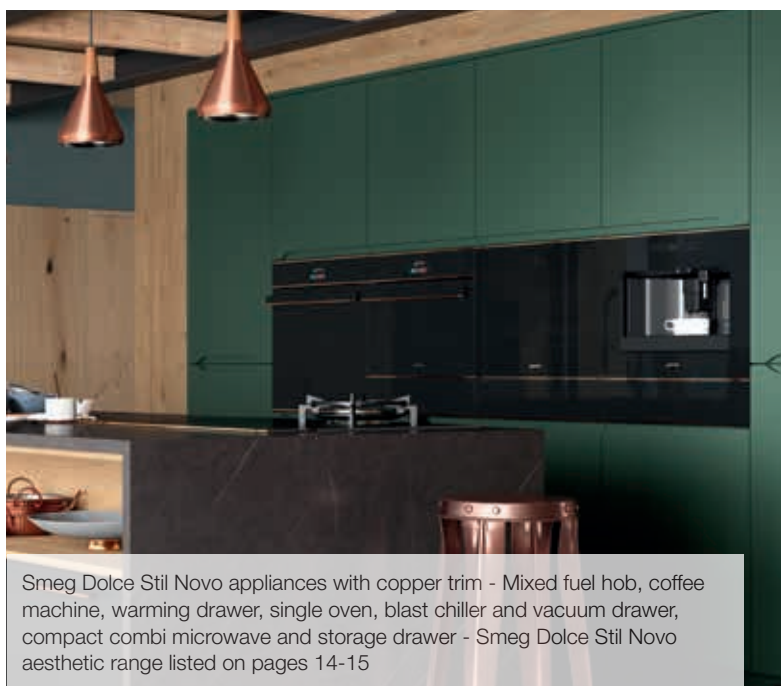

Mixed fuel hobs

Smeg Dolce Stil Novo black glass with copper trim mixed fuel hob - 536.64.371 see page 242

For those who enjoy cooking and appreciate both gas and induction, you can now have the best of both worlds in a single hob. Our selection of mixed fuel hobs combine induction zones with traditional gas burners, offering maximum versatility of use.

Selected models come with ultra-rapid gas burners and durable cast iron pan stands, accompanied by induction zones. The induction zones can be used separately or together as a single large space.

Smeg Dolce Stil Novo appliances with copper trim - Mixed fuel hob, coffee machine, warming drawer, single oven, blast chiller and vacuum drawer, compact combi microwave and storage drawer - Smeg Dolce Stil Novo aesthetic range listed on pages 14-15

Domino Modular Hobs

Domino modular hob systems

Smeg built-in Domino hobs are available in a selection of different fuel types - induction, ceramic and gas

Smeg Domino hobs can offer maximum flexibility when cooking a wide variety of dishes. Each model comes fitted with Classic controls but Linea controls can be purchased separately as a kit to change the aesthetic. The Domino range consists of a barbecue, single or two burner gas hobs, fryer, teppanyaki plate and two zone induction hob. A connecting strip (LGPGF-1) can also be purchased if you wish to arrange a series of Domino hobs together.

VISIT [HAFELE.CO.UK](https://www.hafele.co.uk) TO VIEW THE FULL RANGE

RANGE 24/7

Smegs Classic collection, inspired by architect Guido Canali, is now available in matte black finish. With this new range Smeg provides another option for customers who value timeless design but want the latest trends in their kitchen.

Classic black has a tactile matte finish with a durable coating that adds effortless elegance to the home.

Smeg Classic black chimney hoods

Smeg Classic black built-in ovens and compacts

Smeg Classic black gas hobs

Chimney Hoods

Chimney hoods, 600 mm wide

Rangemaster freestanding appliances - 1100 mm chimney hood in stainless steel Professional Deluxe 1100 mm range cooker 533.01.223 and DXD American fridge freezer in stainless steel with chrome trim - Professional Deluxe listed on page 129

A traditional style chimney hood is the ideal accessory to add style to even a smaller classic kitchen.

Chimney hoods are ideally suited to pairing with range cookers but also work perfectly above built in hobs and ovens.

As well as looking great chimney hoods remove smoke, moisture, grease and smells effectively whilst cooking.

Finally all chimney hoods in our range also feature down lighting making visibility much better in your cooking space, especially if natural lighting is a challenge this means there is no need for extra lamps and wiring

Chimney Hoods

Chimney hoods, 900 mm wide

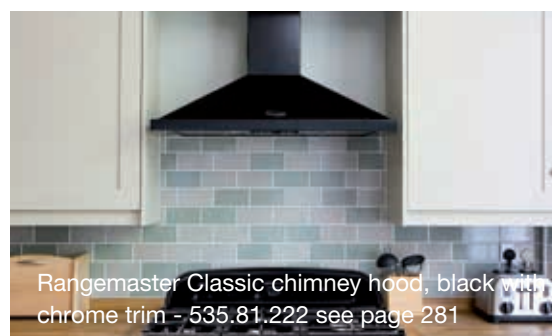

Smeg Portofino appliances - Freestanding range cooker with induction hob and extractor hood in stainless steel finish, white 50's Retro Style fridge freezer - Smeg Portofino range cookers listed on pages 94-95 and 159

Traditional style chimney hoods are an ideal accessory to add style to a classic kitchen.

Whilst working perfectly above built in hobs and ovens chimney hoods are ideally suited to pairing with range cookers and many of the models in our range have directly coordinating range cooker models available.

As well as looking great chimney hoods remove smoke, moisture, grease and smells effectively whilst cooking.

Finally all chimney hoods in our range also feature down lighting making visibility much better in your cooking space, especially if natural lighting is a challenge this means there is no need for extra lamps and wiring.

Contemporary Chimney Hoods

Contemporary design chimney hoods, 900 mm wide

Smeg chimney hood in black - 535.84.043 see page 302

Our range of contemporary chimney hoods effortlessly combine modern design with the latest appliance technology.

Understated styling leaves these models equally appropriate for use in classic and contemporary kitchens, either paired with range cookers or built in hobs and ovens.

As well as looking great chimney hoods remove smoke, moisture, grease and smells effectively whilst cooking.

A selection of chimney hoods in the range also include auto-vent technology. Auto-vent is a system that links compatible hobs and hoods using Smart Bluetooth technology so that they work seamlessly together. Once cooking begins, the fan speed of the hood automatically adjusts according to the temperature and power selected on the hob. The hood will continue to automatically regulate the fan speed as required, depending on the cooking activities.

Contemporary Chimney Hoods

Contemporary chimney hoods, 1200 mm wide

Mercury appliances - Freestanding dual fuel range cooker and extractor hood in Oyster cream and stainless steel finish - Mercury range listed on pages 12-13

Our range of contemporary chimney hoods effortlessly combine modern design with the latest appliance technology.

Whether paired with range cookers or built in hobs and ovens these models are the ideal statement accessory for larger kitchens and as well as looking great chimney hoods remove smoke, moisture, grease and smells effectively whilst cooking.

Finally all chimney hoods in our range also feature down lighting making visibility much better in your cooking space, especially if natural lighting is a challenge this means there is no need for extra lamps and wiring.

Feature and specification comparison table, see pages 314-315

Island Chimney Hoods

Island chimney hoods

Smeg island chimney hood in stainless steel - 536.84.609 see page 335

Designing a spacious open plan kitchen? An Island hood is a great choice installed above a kitchen island unit. They will help remove smoke, moisture, grease and keep open plan kitchens odour free.

With widths from 900-1200 mm available our range of island hoods are perfect for use above large hobs or range cookers.

STEPH

I have moved 535.84.163 to this page from the contemporary hoods spread as it was incorrectly positioned

Ceiling Hoods

Ceiling hoods, 900-1200 mm wide

Smeg ceiling hood in stainless steel -
535.84.063 see page 338

Ceiling hoods are perfect for open plan kitchen/dining areas with an island unit below.

Whether you have limited headroom, or simply want to leave your kitchen open and clear, ceiling hoods provide an elegant space saving solution in any kitchen and are much less intrusive than conventional hoods.

Most Smeg hoods offer the choice of ducting or re-circulating, so you can choose your preferred method.

Downdraft Extraction Hoods

Downdraft extraction hoods

Smeg downdraft hood, 600 mm in stainless steel with black glass - 536.84.640 see page 341

The main advantage of downdraft hoods is the sleek design and space-saving opportunities that these models offer. The hood retracts in and out of your work-surface when you need it- saving invaluable space and maintaining the contemporary and minimalist look in your kitchen or open plan area.

Downdraft hoods are installed behind a hob, reversing the direction of rising smoke and fumes to a downward direction.

The design of the unit lends itself perfectly to a kitchen island, although in traditional work surface settings, the extractor can sit close to the wall behind the hob.

Compact Blast Chillers

Built-in compact blast chillers

Smeg Dolce Stil Novo compact blast chiller - 536.74.171 see page 343

Blast chillers are the latest thing in cooking technology ideal for the professional chef at home.

The main benefit of blast chillers is preserving food quality. Rapid freezing ensures the nutritional properties of fresh foods remain unaltered, which can then be eaten throughout the year without losing flavour and consistency.

Blast chillers are also able to reheat meaning you can go from frozen to reheated inside a single appliance, all perfectly timed for your return to the house.

Wine Coolers

Built-in wine coolers

Smeg Linea wine cooler in black - 535.14.681 see page 345

Our range of Smeg built in wine coolers are ideal for wine connoisseurs.

These premium models perfectly control serving and preserving temperatures, with many other functions such as sharing your wine list. There's also a handy Food & Wine section which pairs recipes with favourite wines thanks to the suggestions of sommeliers and famous chefs.

All models feature removable and sliding oak racks, a homage to noble wine-making traditions. This prestigious natural wood - the same used to make barrels since ancient times - preserves the bottles in their natural environment. The wine coolers internal structure comprises of one compartment controls on the door and the space is distributed between the racks, which, thanks to the increased distance between them, can house differently shaped bottles.

Wine Coolers

Freestanding wine coolers, 600 mm wide

Smeg Classic 197 bottle capacity wine cooler, with right hand hinge in black with stainless steel trim - 536.14.913 see page 371

These freestanding wine cooler models offer maximum capacity for those with the appetite, but not the space, for a full wine cellar. They can hold up to 197 standard 75cl bottles, with some shelves removed, and bottles stored facing front and back.

Both models are finished with UV ray resistant glass which protect against harmful UV rays that can damage the quality of the wine. This together with a motor/ compressor designed with particular care, preserves bottles from harmful vibrations and ensures they remain completely still.

Both models have exterior controls allowing temperature to be set without opening the door, maintaining the internal temperature.

Mini Bars

Freestanding mini bars

Smeg FAB 5 mini bar in pastel green with chrome trim, right hand hinge - Special order FAB5RPG5 see page 375

Smeg FAB 5 mini bar in red with chrome trim, right hand hinge - Special order FAB5RRD5 see page 375

Smeg's FAB5 retro mini bars are a mini fridge with huge personality.

What makes Smeg's FAB range so exciting is its combination of new technology and nostalgic design lines.

The FAB5 mini fridge is the latest interpretation of this philosophy - the coolest little drink and snacks bar around. It operates silently should you wish to install in a hotel suite, an office, for clients, or a bedroom, the FAB5 can go anywhere thanks to its size, style and colour options.

Fridges

Freestanding fridges with ice box

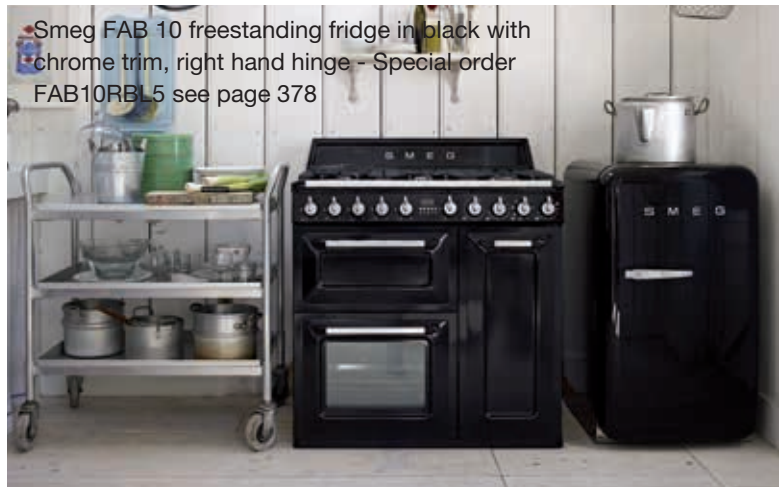

Smeg FAB 10 freestanding fridge union jack with chrome trim, right hand hinge - Special order FAB10RDUJ5 see page 379

Smeg FAB 10 freestanding fridge with ice box in red with chrome trim, right hand hinge - Special order FAB10RRD5 see page 379

Smeg's FAB10 is a small fridge with a big personality.

The FAB10 has been created to fulfil the requirements of modern houses: at just 1 meter high and 540 mm wide, it is ideal for people perhaps living alone or for small kitchens or offices. Despite its petite dimensions, the FAB10 still offers all of the usual features expected from a Smeg FAB refrigerator: the 'A++' rating energy class ensures low energy consumption, and at only 37dB(A) it is practically silent - perfect to be placed in small apartments, or offices.

Smeg FAB 10 freestanding fridge in black with chrome trim, right hand hinge - Special order FAB10RBL5 see page 378

Fridges

Freestanding fridges with ice box

Smeg FAB 28 fridge with ice compartment 536.14.256 and FAB 30 freezer 536.14.095 sit side-by-side perfectly to give you more capacity than a single stand-alone appliance - see pages 386 & 400

Smeg FAB28 coloured refrigerators have become a cult object of style and creativity. They have recently been renewed with enriched interiors and unmistakable refined details.

Rounded curves and chrome details perfectly coordinate the interior and exterior door of the refrigerator.

FAB28 models have a generous 223 litre capacity and with a low, 38 dB noise level can its only their iconic design that gets noticed.

Larder Fridges & Freezers

Freestanding larder fridges and freezers

The Smeg larder fridge and freezer sit perfectly along side each other. Special order UKFS18EV2HX and UKFF18EN2HX see page 389

Smeg freestanding fridges and freezers offer maximum refrigeration capacity for larger spaces.

With reversible doors these models are ideally installed together in a side by side fridge freezer configuration but can also be installed individually as required.

With a smart stainless steel finish these models are both practical and discreet, equally suited to domestic and commercial applications.

Fridge Freezers

Freestanding fridge freezers, 600 mm wide

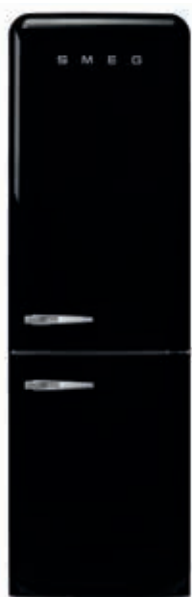

Smeg FAB 32 fridge freezer in white with chrome trim, right hand hinge - 536.14.310 see page 396

Our freestanding fridge freezer, 600 mm range includes Smeg iconic FAB30 and FAB32 models.

Smeg's FAB fridges are often a distinctive element in the kitchen. Their rounded shapes, chromed details and bright colours are key expressions of style and personality. Both FAB30 and FAB32 models offer a sizable capacity to suit your storage needs and features a new stylish interior.

For those needing a more discreet 600 mm solution we also offer standard models in stainless steel and white finishes.

Dishwashers

Built-in dishwashers

Smeg Victoria appliances - Gas hob and extractor hood, single oven and compact combi microwave - Smeg Victoria aesthetic range listed on pages 18-19
50's Retro style freestanding fridge in union jack pattern listed on page 373

Our built in under counter dishwasher models are part of the iconic Smeg FAB range.

The FAB aesthetic combines devilishly good looks with high-performance technology. Beautiful bold finishes and soft round curves reminiscent of 1950's retro design can be seen throughout.

These 50's Retro style dishwashers are available in cream and black, and also come in freestanding options.

Integrated Dishwashers

Fully and semi integrated dishwashers, 600 mm wide

Rangemaster fully integrated dishwasher - 535.21.061 see page 432

Rangemaster fully integrated dishwasher - 535.21.071 see page 432

Our comprehensive range of integrated dishwashers sit discreetly behind kitchen frontals allowing for sleek uniformity of design with consistent panelling, cupboards and doors.

Integrated appliances conserve space within kitchen design allowing increased flexibility of layout.

Häfele offer wi-fi activated, maxi height, and press and release models for handleless kitchens within our extensive range ensuring we have an ideal solution whatever the customers needs.

The Smeg Flexifit hinge system allows smooth sliding of the dishwasher door, in order to offer freedom in the choice of the dimensions of the panel and the plinth, the height of which can vary from 5 to 21.5 cm. The dishwasher harmonises with the cabinet in which it is inserted, allowing the door and the plinth to appear almost flush, with a minimum distance between the two of only 3 mm. This feature assists in fitting and avoids requirement to cut the plinth, also allowing lighting to be run directly under a dishwasher.

Hoover H700 fully integrated dishwasher - 536.28.120 see page 432

Integrated Condenser Dryers

Integrated condenser dryers

Hoover fully integrated condenser dryer - 536.98.500 see page 441

Condenser dryers don't require external venting allowing them to be placed anywhere with access to power supply, either under a counter top in the kitchen itself or in a separate utility.

These models feature a super fast hybrid heating system mixing a heat pump with an air heater. Heat pump technology conserves and re-uses hot air saving money and energy. Using an energy efficient heat exchange system, the air temperature inside the drum is considerably lower than conventional dryers, offering better protection for clothes. The hybrid system delivers faster cycles, while keeping high energy efficiency. In this way it's possible to dry a daily load in less than 2 hours.

With an integrated condenser there is no requirement for external ducting. Water collects in the appliance door so you can clearly see when it needs emptying

Hoover fully integrated condenser dryer - 536.98.500

Washer Dryers

Freestanding washer dryers

Smeg freestanding washer dryer in white with silver trim - 536.94.510 see page 443

Washer dryers combine two functions in one appliance saving space by avoiding the need for a separate washing machine and tumble dryer.

Freestanding washer dryers are an economical choice compared to integrated models and, as they aren't incorporated into the built in kitchen layout, they can be placed anywhere with access to power and water supply, either under a counter top in the kitchen itself or in a separate utility.

As with all Smeg appliances our range of freestanding washer dryers combine offer excellent design and impressive performance.

Freestanding Washing Machines

Freestanding washing machines

Smeg freestanding washing machine with autodose - 536.94.177

Freestanding washing machines offer maximum capacity and excellent washing results. Ease of installation also makes them an ever popular option.

Smegs WNP96SLAAUK model has 14 programmes including steam technology which ensures the finished laundry is left with less creases, an intensive cycle which tackles stubborn stains and a quick wash 14 minute cycle which is great for people on the go.

Autodosing ensures that the perfect amount of detergent is dispensed for the amount of washing, giving you the best possible wash while preventing the waste of liquid.

The automatic load balancing system in the machine automatically adjusts the water according to the weight of the load which saves energy and water consumption.

The DNP83SEUK features a spacious 8kg load capacity which allows more drying to be done per load so is perfect for larger households and is also great for bulkier items such as duvets. It is a highly efficient tumble dryer with an A+++ energy rating.

The machine works by using heat pump technology which conserves and re-uses hot air, saving money and energy. Using an energy efficient heat exchange system, the air temperature inside the drum is considerably lower than conventional dryers, which offers better protection for your clothes.

The structure of the heart shaped drum creates a cushioning layer of air between the clothing and the drum as the clothes tumble, reducing friction and fabric damage. The drum also creates extra lift of the clothing, facilitating excellent airflow and drying performance.

There are 15 programmes to choose from and features include an LED electronic display, delay timer which can be set to run the programme at a convenient time or to take advantage of off-peak energy periods, humidity sensor, inverter motor, and a 40cm large door with 160° opening.

Plinth Appliances

Plinth vacuums and heaters

Sweepovac Big Kick slimline plinth vacuum - 565.29.010 see page 447

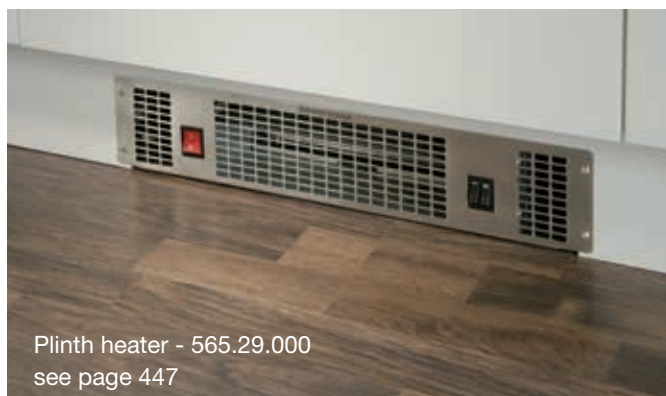

Sweepovac slimline plinth vacuum - 565.29.193 see page 447

Discreet plinth appliances are a fantastic way to add functionality to otherwise wasted space in the kitchen. Häfele offer a choice of plinth vacuum and plinth heater.

Our powerful Sweepovac vacuum requires no setup or put away time. It can be turned into a powerful convenient kitchen vacuum by plugging in a snap on the hose. Five times stronger than the average handheld vacuum, the hose is incredibly easy to handle and extends from 6 ft to 18ft (1.8m to 5.5m).

Our plinth heater provides instant heat where space is at a premium and discreet yet effective heating is required. Cleverly concealed in the 'kick space' beneath kitchen units, stairwells and fitted furniture, a plinth heater eliminates the need for a separate radiator.
