2018

THE AUTUMN EDIT

LATEST TRENDS BROUGHT TO YOU BY

HÄFELE

Welcome to What's New: The Autumn Edit

What's New: The Autumn Edit is packed with inspiration from the fashion and design capital of the world - Milan, following the 21st biennial EuroCucina furniture exhibition.

With the busy lifestyles of today, who wants a cluttered home environment too? We take a look at how sliding and pivot folding doors can create the ultimate minimalist look by concealing your kitchen.

Continuing with the kitchen, we look at handles vs. handle-less. Whether you want to reflect your personality with statement handles, update a kitchen with new trends like brushed chrome or scrap handles

altogether to showcase a streamlined look, we visit all the options available when designing the kitchen of your dreams.

Thinking of dipping your toe, making a splash or even drenching your design with a feature theme? Read page 26 for details of how subtle and more dramatic additions can make all the difference to your space. Sit back, relax and imagine sunning yourself in Italy with a cappuccino and biscotti, while you explore What's New from Häfele this Autumn.

THE VIEW FROM EUROCUCCINA

April of 2018 saw one of the world's largest trade fairs solely dedicated to furniture design take place in Milan, Italy. Launched in 1974, the biennial International Kitchen Exhibition and its collateral event FTK (Technology for the Kitchen) showcases the best industry design.

Exhibits at this year's EuroCucina embodied contemporary design, technological innovation, next generation performance, energy efficiency and ease of use. New shapes, colours and materials helped define the kitchen as a place for socialising and

interaction with the outside world. Throughout this edition of What's New, we bring you 'The View From EuroCucina' – an insight into the show and the key trends we noticed during our visit. We offer insight into the trends you should be keeping an eye out for, and trends that we already see throughout the British furniture market, which show no signs of slowing down yet.

EuroCucina

What makes an award-winning Studio Partner?

HÄFELE
STUDIO PARTNER
AWARDS

Every year, Häfele are proud to host the exclusive Studio Partner Awards, inviting the best-of-the-best Kitchen Studio Partners from across the country to join us in celebration. Following their success, we sat down with 'Studio Partner of the Year' **KF Kitchens** to find out how life has changed for this Award-Winning Kitchen Studio.

AT A GLANCE:

Studio Partner of the Year Award –
The Criteria:

- Fully engaged with the Studio Partnership principle
- Open-minded and excited by new ideas and products
- Consistent business excellence
- Brand engagement and advocacy
- Fantastic customer service
- Commitment to quality

Striving to create your perfect dream kitchen and bedrooms

kfkitchens.co.uk

A huge Congratulations on winning our most coveted award – Studio Partner of the Year at this year's Awards. What does winning mean to you?

Thank you so much! We are very proud to have won the award, especially as we were up against some very strong competition from our industry peers.

“To be recognised nationally for what we do locally is something that we are very proud of.”

And it sounds like you've had more to celebrate since – congratulations on your 10-year anniversary! How did you celebrate?

Yes, it's certainly been an exciting few months! We hosted a cooking day for both existing and new customers at our showroom, which was a fantastic way to celebrate. We had a stunning cake made by

one of our existing customers, and our son sold raffle tickets for his football team, who we sponsor.

That sounds fantastic! So, what can customers expect when they walk into your showroom and how do you help them prioritise their needs?

Our showroom is where the unique experience starts, and we always encourage homeowners to visit us. Most customers we meet are “stuck” or “kitchened-out” as we call it, generally because they have started by considering finer details first and are afraid of getting these decisions wrong. We talk to our customers about the fundamentals of their kitchen, starting with cooking; how they cook, when they cook, where they cook in relation to the room and worktop. We also ensure that customers future-proof their new kitchen.

“We talk to customers about solutions that will have a positive impact on the way they live now and in the future, such as accessible storage, eye-level cooking and eye-level refrigeration.”

Plus, all of our kitchens are built to last – that’s one of the reasons homeowners choose a KF Kitchens Kitchen!

That makes sense, so how do you balance function with style?

Once the fundamentals are secured, we return to colour and interior design options. Kitchens are a balance between practicality, design and, of course, budget.

Our job is to ensure the right balance is met and allow customers to go on a journey to their perfect kitchen. Once a homeowner has committed to a kitchen from us we often spend 15 to 20 hours with them perfecting this balance.

WHAT DO YOU PRIDE YOURSELVES ON DELIVERING TO CUSTOMERS?

Time

We always give customers enough time to ensure they are completely comfortable with their options and feel confident with their choices. We truly get to know our customers, so if we think they are choosing something that is not right for them, we have the experience to let them know and suggest alternatives. We also ensure that we spend time with our customers demonstrating how to use their kitchen most efficiently after installation – how their appliances work, for example.

Transparency

The key, though, is clear information. Transparency allows our customers to make educated choices without fear. We know that buying a new kitchen can be a daunting task, and its so important that customers know what to expect. We find the best way to enable this is to open a dialogue between our customers, and therefore we enable customers to review their full experience on our website.

Expertise

We have over 65 years of combined experience, and you’d struggle to meet a more passionate bunch. In the first instance, we’re all crazy about cooking, so our customers can trust that when we create a kitchen design, cooking is at the core. We’re also all about function, so when we’re stood in a customer’s space, during their free home design visit, we’re already visualising all the fantastic solutions that would benefit their unique requirements.

Choice

The key to choice is enough, but not too much! We’re there to be the experts that help our customers narrow down their choices, and often we can do this in the first consultation, and only present our customers with the pivotal preferences upfront.

CON CEAL ED KITCH ENS

The minimalist trend of major kitchen design shows for another consecutive year!

CREATING THE PERFECT CONCEALED KITCHEN

Hawa Concepta 25 (408.31.000) (408.31.001) (408.31.002) (408.31.003)

A unique folding and pivot sliding system for bi-folding pocket doors is perfect for concealing worktops, drawers, kitchen spaces and more. The flush cabinet fronts open end-to-end and can be completely pushed into the sides, providing full access to the kitchen elements when opened.

Scan the QR code to watch the video of Hawa Concepta in action

A concealed kitchen is not complete if the waste bins are left out in plain sight. Our **Worktop Waste Bins** (503.99.312) can be hidden away by mounting them under a worktop, to offer a seamless look. Leading to minimal spills, they are also very convenient.

Tambour door systems
(443.10.521)

These are a great solution for hiding away kitchen elements, giving space a more organised and sophisticated look. Available in a variety of finishes, including copper, mill gold, anthracite and satin, they can be blended into kitchen design or used as a statement piece to create aesthetic impact.

Accuride 0115RC Sliding Track System
(421.59.801)

Featuring a ball-bearing mounted carriage, which is perfect for sliding objects like worktops, display walls and base units. Transforming a kitchen worktop into a breakfast bar is only a slide away. A hot plate could also be concealed under worktops with ease; the applications are endless.

In Italy, EuroCucina 2018 was once again dominated by clever use of space, particularly regarding concealed kitchens. While the trend has been building momentum since 2016, it continues to grow in popularity with the British furniture market. Minimalist designs and simplicity are the essence of modern/contemporary kitchens, suitable for small spaces and open-plan kitchens alike. When the worktops and hobs are hidden behind cabinetry, it transforms the kitchen into a sophisticated space that can fulfil all the traditional cooking needs. Häfele have just the products you need to implement this design.

GRAND DESIGNS **KETTLE CO**
KITCHENS

Kettle Co. Kitchens, renowned for their craftsmanship and bespoke services, fitted a hidden kitchen for Tom and Danie Raffield; which was showcased on an episode of Grand Designs on Channel 4. The brief was for a kitchen that could blend in with the overall style of their unique timber house in Cornwall. A kitchen concealed behind the Hawa Concepta 25, supplied by Häfele, perfectly suited their requirements of creating a sleek and nature-inspired kitchen. By carefully selecting space-optimised and functional products, such as the Sweepovac, concealed shelf fittings and Loox lighting, gave the project its finishing touches.

Our own-house brand product, the **Loox LED 3032 multi-white strip light** (833.77.200) is a self-adhesive strip light, great for fitting onto any furniture. Its colour temperature is completely adjustable from warm white to cool white, with the help of a multi-white mixer. Without any visible lighting profiles and cables, this completes the hidden kitchen look. All our Loox lighting products offer a 7-year Lifetime Guarantee. Explore our lighting range at www.hafele.co.uk/lighting

Scan the QR code to watch the Loox multi-white mixer video

Vauth-Sagel VS TAL WIRO Broom (549.94.200) is a complete storage unit with fitted wire baskets and cut outs allowing space for storing a broom. At only 150mm wide, this smart storage solution can be easily hidden away with a simple push and great for small spaces.

Sweepovac Slimline Plinth Vacuum (565.29.193) is ideal for kitchens with minimalist designs. With a powerful suction, the vacuum pulls in all the dust from around the unit. This hidden vacuum also offers an add-on extendable hose for more flexibility, completely eliminating the need for space consuming cleaning tools.

The In-Column Larder Fridge from Smeg (536.14.560)

is designed to be built into existing cabinetry give kitchens a seamless appearance and enhance its aesthetic appeal. With a reversible door and adjustable glass shelves, this in-column refrigerator can be customised to suit varied needs.

Kitchen worktops are often used as workstations, turning the surface into a pool of wires and cables. Our fitted **Vertical Powerdock with USB and Bluetooth Speaker** (822.80.500) not only allows people to connect various gadgets, it can also be pushed into the worktop after use, leaving only the top visible.

How To: Style the NEW Minerva Ice Blue Worktop

Homeowners are becoming braver with their kitchen colour palettes and are increasingly looking for Kitchen Designers who are not afraid to inject some character into their designs. With the introduction of a new colour into our Minerva range of solid surface worktops, we asked two experts how they would use this as part of a larger kitchen design.

Kate Emsley
Häfele Area Sales Manager

Kate Emsley has worked as a Häfele Area Sales Manager in the North East of England for the last 3 years, having joined the business with a rich background in the kitchen industry.

Before joining Häfele in the summer of 2015, Kate worked at a Kitchen Studio, both designing kitchens and in account management.

HÄFELE

“ **Kate's Top Tip:**
Introducing colours can define your spaces and create a focal point - perfect for an open or broken plan space. **”**

“
I have chosen Farrow & Ball Railings as my accent colour and Farrow & Ball Wimborne White for the remaining kitchen furniture and walls. Keeping the main theme of the kitchen natural and matching the background colour to the beautiful Minerva worktop allows for a daring dark island, accenting the striking blue flecks. **”**

“

When it comes to introducing colour to kitchens, the preferred choice historically has been to use neutral shades, whilst adding a bold accent colour to your room will give it instant personality. When using dark colours as a statement, natural materials such as wood and stone complement perfectly as a neutral colour palette.

”

Minerva Worktop from Sylmar – Ice Blue

This new worktop is perfect for homeowners who are opting for the on-trend deep blue colourway, paired with beautiful, bold brass. It lends itself to a range of styles; dark or light, big or small, traditional and modern.

With all the benefits of a solid surface – hard-wearing, scratch resistant and long-lasting, the Minerva worktops are easy and flexible to install. Seamless joints and smooth finishes make for an ideal choice for a central island which has become an incredibly desirable feature. Some solid surfaces have restricted sizes and unsightly joints, which can create limitations within the design.

Minerva worktops are easy to install with standard woodworking equipment and they are supplied with pre-finished surfaces and edges. There's no need for the expensive and time-consuming templating usually associated with solid surface products.

Perfectly matched with...

Terrene LED Ceiling Pendant Light

Available in a single light and up to a cluster of 20, the Terrene ceiling light in gold can be a real centrepiece of the kitchen. With its elegant look, this light adds drama to any kitchen: not only creating a visual effect but giving great illumination to any surface.

833.42.083

Smeg Small Domestic Appliances

The Smeg 50s Retro small domestic appliances are a great way to integrate your chosen colours into the kitchen. By choosing the white options for kitchen essentials like kettles or toasters it really complements the palette of this kitchen.

535.43.314 Toaster **535.43.457** Kettle

Pewter Finesse Salvador Handles

Hand finished to give a unique patina, offering an understated but warm and lustrous quality, these handles give your kitchen a real sense of character.

120.89.911 Salvador Knob **120.89.915** Salvador Pull Handle

Smeg Portofino Range

To add personality and originality, injecting a vibrant colour to the scheme is a great option. Reflecting the warm gold flecks in the worktops, the vibrant orange Portofino Range cooker by Smeg with matching hood are a great statement. Bold feature colours are very on trend at the moment, and coupled with some smaller orange accessories (tins, utensils, crockery) it's easy to create a breath-taking statement in the space.

Cooker & Hood

536.84.528 Hood **535.64.858** Range Cooker Electric

Flooring

The natural tones of timber in a mid-to-dark oak finish creates a warm contrast to soft white painted walls and furniture.

Matt Heywood
Kitchen Designer

Matt's experience in the interior design industry provides award-winning, Studio 10 Kitchens, with a wealth of product knowledge, understanding and application experience.

With a passion for great design and a keen eye for detail, Matt believes in British manufacturing, pushing the boundaries of design and creating memorable spaces.

Studio 10 are based in Bakewell,
Derbyshire

Tel: 01629 812200

Website: www.s10kitchens.com

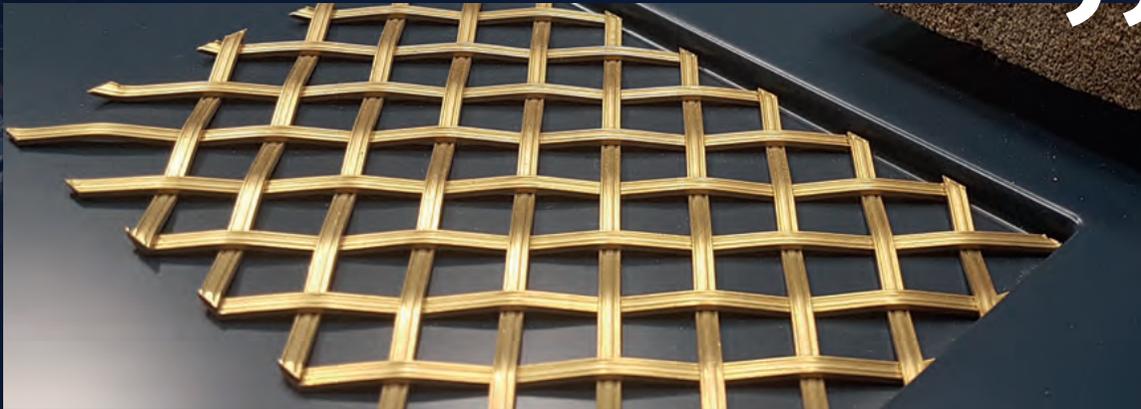

“ Matt's Top Tip:
Pair with industrial accessories for the ultimate finish, using reclaimed wood, galvanized metal and exposed components to complete the look. ”

“

We wanted to create a harmony of eye-catching details; nothing that would detract from the final environment, but a perfect blend of expertly-crafted and individually striking textures and materials. The deep Oxford blue is the colour of the moment, especially when paired with brass accessories, making it a perfect partner for the midnight blue flecks in the Minerva worktop. The brass mesh detailing, paired with the GRAF furniture knob, creates a feel of industrial luxury – a trend we've seen rise in popularity in the Capital, fast-becoming a favourite for homeowners who are brave enough to make the statement.

”

Perfectly matched with...

GRAF Furniture Knob Brushed Brass

A textured finish gives the GRAF knob an industrial feel and the super trendy brass finish adds a contemporary finish to any piece of furniture – perfect for subtly including metallics into your design.

132.19.210

Vauth-Sagel Planero Storage

The Vauth-Sagel kitchen storage range is now available in a lava grey finish. The planero design features strong metal baskets that move smoothly during use and ensure that design is carried right through to cabinet interiors.

548.29.343

Smeg Linea, Built-In Stream Assist Pyrolytic Single Oven

Smeg's Linea range in black offers appliances that will blend into dark cabinetry. Alternatively the range also offers a silver colour which provides a grey finish that helps to make sure that even the appliances are a feature of the design.

536.64.652

Häfele Double Belfast Sink

If you're looking for an industrial finish without compromising on quality and craftsmanship, the Belfast Sink in anthracite is the perfect solution. Designed to mimic concrete, the Belfast comes in double, single and one-and-a-half variations.

567.74.500

Handles vs Handle-less

Designing a new kitchen is an incredibly exciting time, filled with considerations from the initial layout and functionality of the living space to the finishing touches. Handles are one of the details that cement a look, bringing personality and function to a kitchen. However, handle-less finishes continue to grow in popularity – a trend that is heavily influenced by European markets such as Germany and Italy. Here, we explore each style so that you can decide which option is best for you.

Handles

Handles can be a defining feature of a kitchen as well as a practical element. When chosen with care and consideration, handles can blend in subtly, contrast with or highlight features of a kitchen setting, meaning they are one of the most versatile finishing accessories available.

Reflect your personality

Whatever your preferred style of kitchen, careful handle choice can really offer personality to your design. The new GRAF 2 range is a great example of handles that bring a quirky texture and raw finish to furniture – perfect for those who want to inject something a little edgy into their design. In contrast, the U Pull range brings a sophisticated elegance for those who prefer contemporary design – available in three sleek finishes.

GRAF 2 T KNOB
132.19.107

Be practical

Kitchen cabinets and storage areas can be harder to keep clean due to the amount they get used. Handles are durable and provide quick and easy access to cabinet contents, and their inclusion. All of the new handles introduced to the Häfele range are designed to look great whilst withstanding wear.

GLACIO SQUARE KNOB
133.50.120

Increase distinction or fluidity between living areas

With the trend for open and broken plan living spaces increasing in popularity, handles become a way of defining spaces; a physical indication of different living zones or highlighting specific storage cabinets. The Lamont range offers a complete suite of handles

and knobs which can be used throughout an open / broken plan space, highlighting areas of function whilst bringing fluidity to the living space.

BAR HANDLE, 1 RING DESIGN, PEWTER, LAMONT
120.89.912

Update decor easily

A new kitchen should be designed and fitted to suit homeowner lifestyle today and in years to come, but just as needs change during the lifetime of a kitchen, so do trend preferences. Handles offer an easy and cost-effective way for homeowners to update their kitchen as preferences and trends evolve.

Handle less

Handle-less kitchens have become a go-to design demand for luxury kitchens in Europe, and the trend is growing in prominence within British kitchen design and manufacturing. Creating a clean, seamless aesthetic, it's easy to see why this trend is winning so many homeowners over, so could it be the right design for you?

Sleek, streamlined, uncluttered style

Clean, uninterrupted lines are fast becoming the hallmark of contemporary kitchen design, with the majority of appliances, utensils, crockery and food kept behind closed doors. After all, if a homeowner is investing in worksurfaces and splashbacks that are design features in themselves, why hide them?

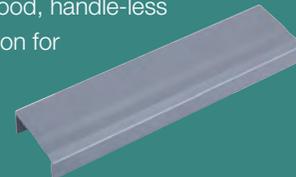

The handle-less trend evolves this further creating a completely streamlined style.

GOLA ALUMINIUM PROFILE
FOR SHELVES
126.89.912

Smother transition between living areas

Modern kitchen design demands a style that brings fluidity between living spaces. With kitchens increasingly serving as a space for socialising, entertaining or working in, on top of preparing and cooking food, handle-less design helps create a smooth transition for multifunctional use. Solutions such as the Line Profile handle maintain this fluidity whilst providing easy-to-access function for everyday use.

LINE PROFILE HANDLE
111.71.510

Safety

As households increasingly accommodate multi-generational living, it is important to think about design features that will be safe for users of all ages. The new Cubic Inset handles provide a flush finish without any protruding fittings or visual disruption.

CUBIC INSET HANDLE

PHOTO BY DAVONPORT

THE VIEW FROM EUROCUCINA

Hidden

Not a new trend to the European market, the hidden kitchen concept continued to evolve in creativity. The most notable kitchens featuring only subtle indications (such as recessed handles) to indicate their purpose. See more on pg7.

Framed furniture

Framed furniture featured heavily at the exhibition, where contrasting materials and hidden handles integrated seamlessly for a handle-less aesthetic and provided an ultra-contemporary design finish.

Handle finishes

Colour featured heavily throughout handles that were on display - matt black and brass were popular colours, well established as go-to finishes.

EuroCucina

Make a **Feature** in Your Kitchen

Whatever your style, however brave you are with design, Häfele have options from 'dipping your toe' to make an accent to 'drenching your design' in colour, and everything in between.

Regardless of the size of your space, there is always an opportunity to make a design statement. As the popularity of interior design and home improvement continues to rise,

those with a space to renovate are looking to be able to push their initial ideas as far as possible, ensuring a wow-factor finish within budget. Maybe you're a homeowner looking for a family room that showcases your unique "Evans Family" personality, or you're a small-business owner redesigning your office space to help your employees feel more inspired, finding the right designer to help create your

vision is critical. A designer is responsible for guiding customers through the design process; transforming preconceptions can be the difference between a beautiful project and a remarkable one, and often the key to this is exploring how far the boundaries of design statements can be pushed.

DIPPING YOUR TOE - GIVING AN ACCENT

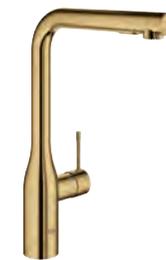

A fantastic way to stay on trend but maintain a classic look is to accentuate a space with accents and accessories.

Subtle nods to a trend gives you the opportunity to see if you like the look before investing in key statement pieces, and change them up more regularly.

Accent colours have the power to transform spaces.

Blacks and greys don't have to darken or depress the feeling within a space – they can frame, add depth and even provide added definition.

Handles, taps and small appliances are by far the easiest and most cost-effective way to achieve an accent. Swapping out handles is a lot easier than changing the complete door, just like changing a tap is a quicker job than swapping out the whole sink.

GROHE Essence Mixer Tap with Pull Out Spray

Now available in a total of ten finishes including a copper 'sunset', brass 'sunrise' and brushed 'hard graphite', the GROHE Essence Mixer Tap is not only an eye-catching statement tap but also extremely functional. With a minimalist design, it ensures accurate temperature control and features a pull out spray with powerful jet. Featured here in Brass 'Cool Sunrise' finish.

569.26.590

Dark Brass GRAF 2 T Handle

With its beautifully bright colour and intricate texture, the GRAF 2 bar handle is a perfect way to give your cabinets a new lease of life. With a mesh surface texture, it works well with a modern 'industrial' look and has a pleasant feel when opening the door or drawer.

132.19.120

Rangemaster Encore Deluxe Range Cooker

Stainless steel is an ever-popular choice for kitchen appliances and a great way to add a subtle metallic feature to your kitchen. New this Autumn is the Rangemaster Encore Deluxe range, an upgrade from the Ceramic cooker featured in this image, the range is available in stainless steel, ivory and black.

533.01.417

MAKE A SPLASH – CREATING A STATEMENT

Feeling more confident? To take your design to the next level, try adding personality to your home by adding a statement piece. Hints of different surfaces, like metallic doors or a textured worktop, can create a premium look, without the premium price tag. Introducing pendant lighting creates an eye-catching feature that can really set your design alight.

Tambour Door System

The Tambour Door System provides form and function in one statement piece. Ideal for breaking up a series of cabinets or providing a solution where hinged doors aren't possible, this door is shown in Anthracite and available in four finishes.

443.10.522

Minerva Solid Surface Worktop

With all the benefits of a Minerva worktop; scratch resistant, easy to install and flexible, it's also available in 15 colours with a variety of textures.

Shown here is the marble effect Carrara White, which looks great with an integrated white acrylic sink, along with a coordinated upstand and splashback.

562.70.335

RAVIOLO Bow Handle

Handles are such a great way to change up your design. This Grand Designs kitchen featured leather handles but we've swapped those out for the new RAVIOLO bow handle in Antique Bronze (Pewter also available). This design is great for a vintage or industrial style kitchen with its distinctive curve and arch.

106.69.296

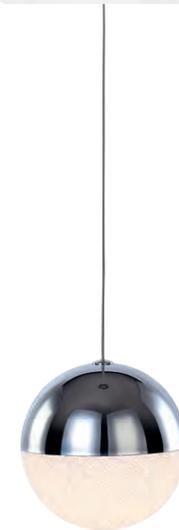

Häfele Double Belfast Sink

The new Belfast sink is finished in a highly desirable anthracite colour, offering a texture that mimics concrete.

Perfect for finishing an industrial or textured look, this is a sink for making a design statement.

567.74.500

Eclipse LED Ceiling Pendant

Often an after-thought, pendant lighting can make all the difference to your room and become a real talking point. The Eclipse pendant light is a spherical design complemented by crushed crystal diffusers, creating a cracked glass texture. Available in Chrome or Copper and as a single pendant up to a cluster of 20 lights.

833.42.040

DRENCH YOUR DESIGN

Our final trend, Drench Your Design, demonstrates how taking an initial concept and allowing complete blue sky thinking can create a memorable and impressive finished product. Here at Häfele, we believe that contrast, colour and clashing can all be fantastic tools to make the most of this trend and are dedicated to offering the products needed to make this a reality.

Smeg Fridge Freezer

The Smeg Retro range is ideal for adding colour to your kitchen and the freestanding fridge freezer definitely creates a feature.

Available in 10 variations including a Union Jack flag, this fridge is bound to get your guests talking.

536.14.109

Loox LED Flexible Strip Lighting RGB

For the ultimate eye-catching look, set your whole design alight with the multi-coloured strip lighting from Loox. Ideal for mounting under cabinets/shelves or even highlighting handle-less profiles, these lights can set the atmosphere for any occasion.

833.71.335

Smeg Portofino Range

The real eye-grabber of this kitchen is the Smeg Portofino Range Cookers and Chimney Hoods. Inspired by small harbours around the Mediterranean this range is available in 8 vibrant colours. The orange finish in this image creates a bold focal point while the range cookers provide the functionality needed for everyday cooking by combining solid design and quality performance. Available in dual fuel (gas hob) or electric (induction hob).

536.84.528 (Hood) **535.64.858** (Range Cooker Electric)

Product Spotlights

With so many great new products this Autumn, we simply couldn't fit them all in, so here's a few more highlights to digest.

NEW
APPLIANCES
COMING
SOON...

M-STAX LARDER UNIT WITH DRAWERS

A flexible larder unit allowing maximum capacity, the new M-STAX comes with pre-assembled drawers for ease of installation. Gone are the days of juggling items from shelves and searching for long lost jars at the back of the cupboard, simply pull out each drawer for full visibility of the contents.

Ingredients can be found easily by viewing from the top, front, and sides. The drawers are soft-close and have a maximum capacity of 50kg, so even heavier items can be stored safely. The M-STAX is available in grey and anthracite grey, to match the latest kitchen trends.

554.28.365

M-STAX stack with 1x standard and 4x pan drawers - also one pan drawer with additional height extension panels to create a solid side drawer

WHATLOCK® MAGNETIC LOCK SYSTEM FOR DOORS

An invisible lock system that's great for child protection, the whatlock® magnetic opener is a latch and magnetic key solution to childproofing your kitchen. Easy to retrofit to any drawer or cabinet between 16-25mm thick, using 3M adhesive pads or screws, the latchbolt is retracted when the door is closed and can be reopened when presenting the whatlock® magnetic opener, which can be stored in a safe place out of the reach of children. For ultimate flexibility, the lock can also be switched off and left in the open position when not in use.

245.41.794

GOLA SYSTEM A LED PROFILE

For the ultimate sleek and uncluttered style, the Gola Profile allows for the increasingly popular handle-less finish for kitchens. Available for a variety of applications, including vertical fixing between doors and horizontal fixing under worktops, this handle-less look can truly streamline your kitchen.

With lighting becoming an increasingly important feature of the kitchen, the Gola Profile has gone one step further for that ultra-modern look, by adding a slot for LED strip lights to its horizontal fixing for fitting under wall units.

126.48.920

RANGEMASTER ENCORE DELUXE

In a sleek and contemporary design, the Rangemaster Encore Deluxe is the perfect addition to any kitchen. Available in a choice of colours, it features the deluxe glide-out grill with 4-way trivet, two spacious oven cavities including a telescopic shelf and a large hob space, offering plenty of room for cooking. Available in the dual fuel option with 4 gas burners, including a multi-ring wok burner, sit on cast-iron griddle and cast-iron pan supports or the electric version with 5 cooking zones and a hot hob indicator for added safety.

533.01.386

WASTE BOSS DUO PULL OUT BIN - 2 X 32L BINS, MIN. 400MM CABINET

An integrated bin for smaller cabinets without compromising on capacity, the Waste Boss Duo Pull Out Bin works with cabinets from 400mm wide; with two 32L bins, ideal for waste separation. The integrated bin is the ideal floor space saver for kitchens.

It can be included from the design stage or retrofitted to an existing cabinet. Base mounted and featuring over extension runners with a 25kg load capacity, the Waste Boss Duo Pull Out Bin is truly fit for purpose with a strong supporting structure. Waste Boss Duo has a handy metal lid that also works as a shelf, and each bin features two handles for ease of emptying.
