

## MODERN TRIANGLE LIGHT

12 Volt 10 Watt downlight

### Components

- 1 x triangle with 1,8m interconnecting cable
- 1 x halogen bulb
- 1 x amp connector
- 1 x strain relief clamp

### General

Please read these instructions carefully before commencing installation and retain them for future reference.

**If in any doubt, we recommend that you consult a qualified electrician.** These products must not be modified.

If any modification is made, it may invalidate the warranty and may render the product unsafe. All electrical installations must be carried out in accordance with current IEE Wiring Regulations (BS7671). Connect via a safety transformer only. Do not connect lamps directly to mains. Apply enclosed strain relief device between light and transformer.

### Safety instructions

1. Before commencing installation or maintenance, isolate the mains supply by switching off at the fuse box.
2. The lights should be mounted onto a secure surface.  
Position lights where they will not be directly exposed to steam, splashes etc. Do not attach to surfaces which are damp, freshly painted or otherwise electrically conductive.
3. This product is suitable for indoor use only.
4. Ensure the lights are kept away from materials that may burn (e.g. curtains, bedding).
5. The product must be installed so that the distance between the lamps and any other object is at least 0.15m as shown in Fig. A.
6. If any bulbs or their glass covers become cracked or damaged, stop use immediately and replace them.  
Bulbs required are 12V/10W G4.
7. Caution - bulbs get HOT quickly. Switch off at mains and allow lamps to cool down before replacing.
8. When replacing the bulb ensure you do not handle the replacement bulb with bare hands, use a dry cloth or gloves, if you use bare hands this will reduce the lamp life considerably.
9. Only use replacement bulbs which are marked accordingly.
10. Suitable for furniture installation.
11. Appropriate for installation on normally flammable material (e.g. wood), not highly flammable surfaces (e.g. cardboard, textiles).
12. Class III safety extra low voltage (SELV).
